

PRELIMINARY STUDIES OF EUTROPHICATION OF BETWA RIVER

MANOJ DATAR

Abstract

Water quality of natural water bodies is being affected by several factors like industrial waste discharge, agricultural runoff, sewage disposal etc. The excessive discharges of nitrate and phosphate contents give rise to Eutrophication problem. This paper brings about a preliminary study of eutrophication in Betwa river in Vidisha city. The control measure for eutrophication are also suggested.

Keywords: Betwa river, Eutrophication, nutrients.
