# TIME AND LOCATION BASED REMINDER SYSTEM

**V. R. PAWAR AND P. R. DEVALE**

## Abstract

This is an application that helps business people to coordinate their day-to-day activities with their demanding business schedules. For the everyday person conducting business on the go , there are often many tasks that need to be completed in a given day. Some of these tasks must be completed at a particular time, but others simply need to be completed when the user is at particular location. So with the help of reminder user gets reminder of what to do when to do and at what location.
