

## **ADAPTIVE REGION SEGMENTATION IN SATELLITE IMAGES FOR URBAN AND NON URBAN REGION DETECTION**

**S. PRAVEENA, S. P. SINGH AND I. V. MURALI KRISHNA**

### **Abstract**

In this paper a novel approach for the detection and isolation of regions in Aerial image is defined. A co-occurrences based image coding approach with spatial similar image processing is suggested. The paper outlines a novel approach for the exact isolation of region of interest in the Aerial image for region prediction and recognition.
