Abstract

Third-party logistics is an important part of the logistics industry, plays an important and irreplaceable role in China's economic development. But there are still many problems in our third-party logistics, limiting its broader development. This paper discusses the connotation of third-party logistics, analyzes the main problems existing in the development of third-party logistics, and further proposes development countermeasures of third-party logistics.

Keywords: third-party logistics; connotation; the main problems; countermeasures
