

CHARACTER RECOGNITION USING EUCLIDEAN DISTANCE METHODS

R. CHANDRASEKARAN AND RM. CHANDRASEKAR

Abstract

Extracting the text from Images has become an important feature in many of the applications. This paper uses simple Euclidean Distance methods for character Recognition and the results were compared.

List of Abbreviations

ED	- Euclidean distance,
NN	- Neural Networks
CPT	- Central Projection Transformation.
AIMED	- Adaptive Image Euclidean. Distance.
